

Car Park Layout Design, Operation and Control System

Overview

MVA offers a complete range of services for car park layout design, operation and control system, working closely with developers, architects, planners, engineers, suppliers and contractors in private sectors.

We are involved from initial concept stages, through planning, feasibility, design, installation, testing and commissioning of the car parking system.

MVA operates in Asia through its head office in Hong Kong; through regional offices in China, Singapore and Thailand; and through project offices in other countries as required.

Highlights of Key Experience in Asia
