

## Introduction

In recent years, MVA has been involved in several prestigious transportation projects in New Zealand. Projects have been undertaken on behalf of both public and private sector clients, including major strategy studies sponsored by overseas funding organisations. Projects have been carried out jointly with local firms, combining international local expertise, knowledge and experience.

## MVA Consultancy Services

MVA provides professional consultancy services in all aspects of traffic and transport planning and management. We advise on transport policy, plans and projects and on the operation of transport and traffic systems, at national, regional, urban and local levels. Clients include Governments, local authorities, transport operators, project developers and financial institutions. MVA Asia Ltd has a head office in Hong Kong, and regional or local offices in most major countries in Asia.

MVA was required to develop a public transport model in order to assess LRT patronage and revenue forecasts. MVA's responsibilities included investigation of fare sensitivity tests and the phasing of options.

## Major Redevelopment of Freight yard, Auckland, New Zealand

MVA were the project advisors for traffic study of a major redevelopment of the Auckland railway freight yard. This proposed to be the largest redevelopment project ever undertaken in the city and would add around 20% to central area employment.

## Christchurch Transportation Model Update, New Zealand

MVA was part of the consultancy team for this major transportation project and was responsible for model development. The updated Christchurch Transportation Model will provide a tool to assess and monitor various scenarios for enhancing the transport network and facilitate planners achieving the overarching objective of developing a safer and more sustainable transport network for the future.

## Wellington Light Rail Transit Study, New Zealand
